

Social FARMS is an innovative Strategic Partnership project started in November 2020 and ending in October 2022, granted under the European Union Programme **Erasmus+** within the Key Action 2 **Cooperation for Innovation and the Exchange of Good Practices**.

There are six project partner organizations representing five countries: Italy, Austria, the Netherlands, Spain and Turkey.

Main Objectives and Results

Main scope of the Social FARMS project is the realization of training materials able to train the competences needed to specialize key professionals in the social farming sector by using and adapting the farm activities to the needs of persons with different kinds of disabilities for rehabilitation and therapeutic purposes.

Main project product will be a platform for long distance learning including three modules dedicated to each one of the three key profiles interacting with the inclusion path of the person with disability:

in charge to follow-up the field program;

responsible for the realization of the inclusion plan;

who will accompany on behalf of the social/health services the inclusion of the person with disability.

All together the training materials will allow a better understanding of how the triad can contribute to the growth of the **social farming** services in Europe.
